DANGEROUS GOODS CABINETS

Orbit Dangerous Goods Storage Cabinets are the optimum solution to the safe and secure storage of all types of dangerous chemicals. The Cabinets are made from a fully steel welded construction with double wall thermal barrier, self-closing doors and adjustable shelves with built in spill containment system. Our range includes flammable and corrosive storage.

Quality Solutions**

Standard SizeCapacity (L)	Capacity (L)						
	30	100	160	250	820	1000	2000
Flammable Cabinets (Indoors)	✓	✓	✓	✓			
Flammable Cabinets (Outdoors)					✓	✓	✓
Corrosive Cabinets	✓	✓	✓	✓			

All our Dangerous Goods Cabinets comply with the relevant standards. Our Flammable Cabinets are built to comply with AS 1940. Our Corrosive Cabinets are built to comply with AS 3780.

With the use of our Dangerous Goods Cabinets, you can have peace of mind that your hazardous substances are being stored safely and securely, protecting your people and the environment they work in.

Flammable Cabinets come in either an indoor or metal outdoor option. All safety signage required will come fitted with the unit.

Corrosive Storage Cabinets offers a safe and secure storage solution for most substances under Class 8 of Dangerous Goods.
