MOBILE STORAGE SYSTEMS

Orbit Mobile Storage Systems is an effective way to maximise the use of valuable floor space, utilising a transferable aisle to gain improved access and better organisation. The design and layout can be tailored to meet the specific requirements of any work environment. Fully fitted with adjustable shelves, the system remains flexible with the option to fit file racks and dividers for organisation.

Innovative Design Efficient Installation Quality Solutions

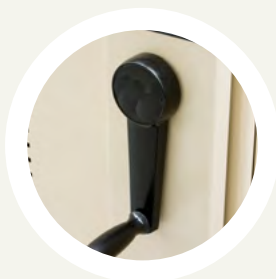

Orbit Mobile Storage Systems provides easy access to all of your important business documents at any given time, maximising the productivity of your office. The storage system moves along the rollers giving easy access to all documents within any unit. The storage system will increase your floor space by utilising a transferable aisle, increasing the access and organisation of your documents.

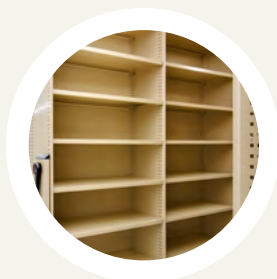

Within each console of the storage system, they can be locked. This provides extra security for your documents and files.

A Mobile Storage System is a useful way to increase the use of your floor space, the storage systems use a transferable aisle to obtain improved access and better organisation of your documents.

Mobile Storage Systems have the option of adding mechanically assisted mobiles or handles, this then means that the large mobile units can be shifted with ease and the strain on the operator is decreased.

The shelves on the Mobile Storage System are fully adjustable in 25mm increments. This allows for flexibility, giving the option to attach dividers and file racks to the storage system.
