## PARTS TRAYS

Parts Trays are an ideal storage solution for the storage of small goods and loose parts. They are a cost effective solution with the customisation of being able to add dividers. Parts Trays provide for high density storage of small components and allow for easy identification.

**Innovative Design  
Efficient Installation  
Quality Solutions**

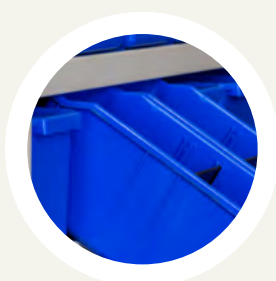

Parts Trays Sizes								
<b>Height</b>	60	110	110	110	110	110	135	135
<b>Width</b>	100	100	100	100	150	150	220	300
<b>Depth</b>	415	315	415	615	415	615	415	415
<b>Dividers</b>	3	2	2	3	3	3	2	2

The Parts Trays are designed with a large front flat surface to fit adhesive labels for simple identification of the contents.

The dividers are adjustable in order to customise the compartment sizes within the Parts Tray and additional dividers can be inserted to increase the number of compartments.

Parts Trays includes a back stops for viewing of the contents when fitted to a Rolled Upright Shelving System.

Parts Trays are designed to integrate with Rolled Upright Shelving Systems. The trays can be used to store small parts and components in an organised manner.
