solutions

## RAISED STORAGE AREAS

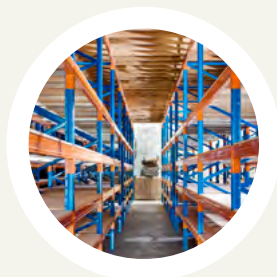

Orbit Raised Storage Areas offer cost-effective solutions, doubling the usable floor space area to maximise the productivity of your warehouse space and warehouse storage solutions. Multi-tier floor configurations are available for raised storage areas. Stairs are fitted to the raised storage area providing safe and easy access.

## Innovative Design Efficient Installation Quality Solutions

Raised Storage Areas give you the operational flexibility to integrate shelving systems and warehouse storage solutions to suit your application, optimising small parts picking operations.

A Structural Raised Storage Area is made from steel and only requires a few pillars to support the raised area. This provides flexibility on how the storage area is utilised.

Rack Supported Raised Storage Areas use the racking structure to support the raised area, platforms can be created to allow for picking on several levels.

Our Raised Storage Areas are designed in a way to so as to intergrate with stairs.

A Roll Over Gate provides an easy and safe way to transfer a pallet from the raised storage area. It keeps operators safe at all times from risk of falling.
