SELECTIVE PALLET RACKING

Orbit Selective Pallet Racking is an effective and time saving solution for storing pallets and large items; ensuring easy access to all stock at any given time increasing productivity and giving a fast return on your investment. Our Selective Pallet Racking is designed, engineered and certified to comply with the relevant international standards; including Australian Standard AS4084.

Innovative Design Efficient Installation Quality Solutions

Height/Depth Standard Sizes (mm)		Standard Beam Sizes & Capacities		Beam Length (mm)										
Height	Depths			1372	1829	2591	2743	3048	3200	3350	3650	3810

Frame Protectors offer increased safety by preventing accidental forklift damage to uprights; reducing down time and repairs.

Mesh Backing can be added to provide an effective safety barrier between pallet storage and general warehouse operation zones.

The beam retaining pin system provides greater safety ensuring beams are retained correctly; avoiding accidental dislodgement.

The Finish of the Selective Pallet Racking is available in either Pre-Galvanised Frames and Safety Orange Powder-Coat Beams; ideal for indoor scenarios or a Hot Dipped Galvanised finish which provide ultimate protection from the elements when installed outdoors.
